

Sabree Inc.

SABREE, Inc. is an SBA 8(a) Certified and CVE Certified Service Disabled Veteran Owned Small Disadvantage Business. Our firm is a full service provider and defense contractor with multifaceted capabilities. Our team of professionals provides services in Construction Management, Design/Build, Operations & Maintenance, Renovation Specialties, Architecture, Engineering design, Facilities Management, Engineering Operations, Environmental Services, Historical Preservation, and Security Services. Located in the greater Baltimore, MD area, SABREE Inc. was incorporated in September 2006. Since then SABREE has established a successful track record and provided professional services to the Baltimore, Washington and Philadelphia General Services Administration offices, the Army Corps of Engineers, the Naval Facilities Command, the Department of Energy, the Navy Yard, National Defense University and many military bases.

We earned our reputation for reliability by providing quality services in a cost-effective and efficient manner. Our mission and standard is to provide all of our clients with an exceptional level of performance lead by a professional group of staff. We guarantee customer satisfaction and we fulfill our duties with pride, professionalism and integrity.

Integrity Applications, Inc.

IAI provides subject matter expertise and technical support services across a wide range of functional areas listed below. IAI will provide Program Management and Systems Engineering expertise leveraging highly experienced and community recognized experts trusted by the National Security Space Community, SPAWAR and SMC.

Past Performance

SMC IRRT; POP: 7 Sep 2009-6 Sep 2014 (if all options exercised)

SAIC Prime Contract: FA8802-09-A-0005

IAI Subcontract: PO10023364

IAI serves as subcontractor teammate on the standing SMC (Space and Missile Systems Center) Commander's Independent Readiness Review Team. Unlike many other independent teams that have a limited scope and well-defined duration, the SMC Commander's IRRT is a standing group of experts that reviews SMC programs as directed by the Commander as the programs move forward in the acquisition process and approach launch and, in the case of spacecraft, on-orbit checkout/operations. The IRRT's reviews are scheduled to provide sufficient time for effective program office review and implementation of critical recommendations prior to key program milestones, such as spacecraft shipment to the launch site. The IRRT also attempts to minimize program office and development contractor activity impacts and maximize the time available for correcting identified problems by working shoulder-to-shoulder with the program office and development contractors. In particular, IAI provides technical assessments of the Minotaur family of launch vehicles, GPS IIF spacecraft, some STP spacecraft, and GPS III software. IAI focuses on test-like-you-fly exceptions, critical qualification margins, first flight items, single point failures, non-conformances, waivers, deviations, anomalies, escapements, unverified failures, plus out-of-position, out-of-sequence, and out-of-family items. In summary, IAI identifies risks to mission success and then recommends corrective actions to the program offices and the SMC Commander/PEO.

Launch SE&I; POP: 27 Apr 2010 - 22 Mar 2020 (if all options exercised)

ManTech Prime Contract: FA8811-10C-0002

IAI Subcontract: MSD-10-S-002-007

IAI is a subcontractor teammate on the Launch Systems Engineering & Integration contract for the Launch and Range Systems Directorate at SMC. We support concept trade studies identified by the government to include reach back to specialized Subject Matter Experts as needed. IAI also serves as the Rehearsal Anomaly Team Coordinator, the SE&I Mission Integration Manager (SMIM) in support of the Government Mission Integration Manager for multiple Atlas V and Delta IV missions, as well as the Schedule Manager for all launch and range activities at the LR SPO and both major launch sites (Cape Canaveral, FL and Vandenberg AFB, CA). To date, IAI has led over 15 successful Atlas V and Delta IV launch rehearsals plus development of a launch anomaly database to aid in future launch rehearsal prep and planning; launch rehearsal planning includes development of the rehearsal timeline, leading meetings to determine and task out anomaly development activities, and developing and briefing the initial conditions and rehearsal overview information during academics. Leading the rehearsals includes briefing initial conditions on the net at the start of rehearsal, controlling all anomaly actions by directing updates or ending an anomaly if team actions will result in the rehearsal going off track, ensuring all rehearsal team members inject prepared anomalies as planned, and announcing end of exercise when rehearsal has completed. In support of the launch anomaly database task, anomalies from various rehearsals, wet dress activities, and launches are input into the database to provide the Launch team with a source of information for future launch vehicle anomalies rehearsal planning. The database provides the ability to search for anomalies based on launch vehicle or space vehicle type, anomaly outcome such as T-0 recycle, launch site, etc. IAI also leads the Integrated Master Schedule development for the entire launch and range enterprise. This is a new concept, which will ultimately integrate the activities of the Launch and Range Directorate at SMC, the Ranges, the technical reviews, mission assurance, current / future major projects, early integration, acquisition, and major factory development activities plus seamlessly track changes and impacts to all key stakeholders.

IBM Business Consulting Services

IBM is a Gartner top quadrant and information technology (IT) services company with extensive experience and capabilities directly and highly relevant to Navy IT, Financial Management (FM), Business Process Engineering (BRR) and Navy Enterprise Resource Planning (ERP) solutions among others. We provide the Navy with: (1) unmatched ability to support the Navy program offices in integrating solutions with the Navy ERP (2) Navy supply and maintenance business process subject matter knowledge; (3) more than 7 years of Navy ERP SAP solution design, development, and deployment experience; (4) an extensive understanding of the challenges facing the Navy FM, ERP and BPR program; and (5) the necessary resources and infrastructure to achieve performance, schedule, and cost goals.

Past Performance

As a SeaPort-e prime, IBM has a long list of past performance qualifications listed at:
<http://www-1.ibm.com/gold/portal/servlet/gold/seaport/Welcome>

IBM current work includes tasks for the Navy ERP Deployment and FMO Support.

Interclipse

Interclipse, Inc. a small business with headquarters in Maryland, was founded to provide high-end consulting services, solutions-based engineering, and hardware/software value-added reselling to the Department of Defense and the United States Intelligence Community. INTERCLYPSE brings over 50 years of state-of-the art engineering and sales experience to address the most demanding problems.

Extensive experience with standards-based rapid application development, full life-cycle development, project management, requirements definition and analysis, enterprise architecture, software engineering, object-oriented design and development, web development, portal application development, database engineering and administration, structured and unstructured data mining, multi-tier architectures, service/resource oriented architectures, federated query systems, geographic information systems (GIS), information assurance, testing, and documentation.

Past Performance

NSA APPLIEDSNOOPY - Interclipse under subcontract to Windermere, provided engineering services to include system architecture & design, software development, and system & network administration for TAO.

NSA REDBARON - Interclipse under subcontract to SAIC and a follow-on to APPLIEDSNOOPY, provides engineering services to include system architecture & design, software development, and system & network administration for TAO.

NSA SECUREINSIGHT - Interclipse is providing a turn-key system to this DIRNSA visible program under a firm fixed price contract.

NSA JOURNEYMAN - Interclipse under subcontract to Booz Allen Hamilton worked with existing JOURNEYMAN technical staff to address a critical deficiency in their architecture that gained DIRNSA visibility.

NSA ESPACE - Interclipse under subcontract to Booz Allen Hamilton, provided system architecture, design review, and addressed several deficiency by re-configuring and re-programming their controlled enclave interface specific to security and mission assurance for the ESPACE program.

JIEDO - Interclipse under a firm fixed price contract integrated a mission assurance capability for the JIEDO collaboration environment.

Parker Tide

Parker Tide is a veteran-owned, small-business located in the heart of downtown Washington, DC. We provide recruitment, staff augmentation, and strategic solutions to both the Federal Government and the private sector, nationwide. We provide solutions to our Federal customers through our GSA Schedules: TAPS 736 (Temporary Administrative Support Services), EEO 738X (Human Resources & Equal Employment Opportunity Services), MOBIS (Mission Oriented Business Integrated Services), and GWAC (Teaming Partner, Government Wide Acquisition Contract).

Past Performance

- IRS Personnel Security – Adjudication Support Services: Provided Personnel Security Suitability Adjudication Support Services to the Human Capital Office of IRS. Supported surge needs for suitability adjudication for contractors and FTE's for all of IRS. Project value was \$418,684.94
- US State Dept Program Support Services: Program and project support to the US State Dept. since 2008. Total project value to date: \$523,000
- US National Institutes of Health – Administrative Support Services: Have been providing administrative support services to NIH since 2006. Total contract value \$2.4M.

Cardinal Concern LLC

Cardinal Concern LLC was founded in 2010 and offers the following services:

- Electrical and computer engineering
- Integration of space and avionics systems
- Electronics systems design (both analog and digital expertise)
- Sensor design and interfacing
- Computer processor design
- Massively parallel systems using hardware and software
- Microprocessor-based design and programming
- Reconfigurable field-programmable gate array (FPGA) system design

The company's name embodies the following cardinal concerns:

- Integrity
- Customer satisfaction
- Technical competence
- Innovation
- Reliability

Past Performance

Established 2010. The owner is a 30-year Navy veteran, qualified as a Mission Commander flying E-2C Hawkeye aircraft at sea, who later served as an Associate Professor and Chair of the Electrical and Computer Engineering Department at the United States Naval Academy. A licensed Professional Engineer with an extensive record of research published in peer-reviewed publications, he teaches graduate students part-time at Johns Hopkins University.

MTCI

Founded in December 1999, MTCI is a woman-owned small business headquartered in Dumfries, Virginia. MTCI takes pride in "Maximizing Human Potential" by empowering their 165 plus associates to provide superior services and solutions to their clients spread throughout 42 states.

Past Performance

- Accessions System Branch – Training Development: Has provided training and tech support for the Army National Guard to all 54 states and territories over eight years. Current project value: \$2.7M
- Army National Guard Readiness Improvement Program (ARIP): Analytical and technical readiness support to the Army National Guard since 2004. ROI \$20M annually. Current project value: \$3.7M
- Low Density Recruiting (LDR): High-level Military Intelligence, Special Forces and other specialty recruiting solutions to the Army National Guard since 2004. ROI \$25M annually. Current project value: \$1.3M.

Accenture Federal Services, LLC

Accenture is a global management consulting, technology services and outsourcing company, with approximately 266,000 people serving clients in more than 120 countries. Combining unparalleled experience, comprehensive capabilities across all industries and business functions, and extensive research on the world's most successful companies, Accenture collaborates with clients to help them become high-performance businesses and governments. The company generated net revenues of US\$27.9 billion for the fiscal year ended Aug. 31, 2012.

Past Performance

A list of the last 3 years services experience is listed at the SeaPort-e Contractor Information Registration site, listed by functional area and specific Program, as appropriate.

BOOZ ALLEN HAMILTON INC

Maritime Enterprise Engineering and Management: Booz Allen has provided strategy and technology services to the Department of Navy for over 60 years. We currently provide support to nearly every organization in the Department. Our support is broad -- from developing enterprise-wide strategies to C4ISR systems engineering and deployment to maritime logistics -- Booz Allen considers the Navy one of the cornerstones of its Federal business.

- IT Transformation, Strategy, and Design: Booz Allen Hamilton brings technical and functional expertise in systems development, engineering, and management to provide support through every phase of the information technology life cycle, including world-class design and engineering services.
- Program Management and Defense Acquisition Support: Our professionals -combining technical and functional expertise in technology, engineering, and management- integrate sound management principles with the most appropriate technologies to assist Government leaders in effectively managing programmatic, schedule, and technical risks. We address many elements of the acquisition cycle, including technology demonstration/validation, testing of full-scale engineering development, production of systems, and installation management. Booz Allen's life cycle management services address every aspect of the program management and acquisition process.
- Supply Chain Management: We take a top-down strategic approach to the supply chain, understanding that its management involves more than operations or logistics. Booz Allen Hamilton has been at the forefront of every major development in the field, from the extended enterprise and channel partners to strategic sourcing, manufacturing strategy, and new techniques for managing complexity. With each new development, we have helped the Government and commercial clients meet evolving challenges with sophisticated tools and solutions.
- Wargaming and Strategic Simulation: Recognized worldwide as a leader in wargaming and strategic competitive simulations, Booz Allen Hamilton has created and facilitated wargames for the Office of the Secretary of Defense, military services, and numerous other government organizations. We have also used advanced simulations as a strategic tool for Fortune 100 companies in the utility, manufacturing, pharmaceutical, agribusiness, and consumer product fields. Our wargame specialists design games to accommodate a wide range of scenarios, and explore the role of the latest technologies. Our state-of-the-art wargaming and modeling facilities give senior defense and business executives the ability to test advanced concepts, conduct integrated training, and engage in real-time interactive scenarios, including distributed simulations.

F41624-98-D-1003

Mr. Robert Balusek, TRAC2ES - 311th Human Systems Wing; (210) 536-5020

The TRAC2ES Program is a full life cycle systems development project, designated ACAT 1 AIS. BAH successfully completed all initial development tasks and completed an Independent Operational Test and Evaluation, receiving Interoperability Certification, DII COE Level VI Certification, and Milestone III approval. Initial Operational Capability (IOC) for TRAC2ES was declared on 12 July 2001 and TRAC2ES received a 3 year Authority To Operate from USTRANSCOM concurrent with IOC. Now transitioned to the operational support phase, BAH provides TIER III support to the operational system to include system upgrades and enhancements. BAH is also supporting the introduction of new functionality into the TRAC2ES enterprise and anticipates the issuance of a Full Operational Capability Task Order in Government Fiscal Year 04, that required to complete the development of the remaining functional requirements that were validated under the system's Operational Requirements Document.

GS00T99ALD0202

Ann D. Williams; (703) 768-2405 or Ms. Norma St. Claire, (703) 696-8710 (DIMHRS JRIO)

Booz Allen provides JR&IO a wide variety of technical and management expertise in support of the Defense Integrated Military Human Resource System (DIMHRS) and JR&IO. The services include facilitated requirements workshops, documenting requirements within the Rational Tool Suite, representation and support to the on-going OSD Comptroller FMMT review, and technical/acquisition support to assigned programs.

GS00T99ALD0202

Diane Devens (ADNET / Counter Drug Division, DISA), (703) 306-7554

BAH has been the prime contractor since 1996 for the AntiDrug Network (ADNET), an information exchange network for Federal law enforcement agencies and Department of Defense (DoD) organizations with counterdrug missions and supports more than 50 agencies in more than 100 locations worldwide. BAH support encompasses the entire lifecycle of this complex program including, program management support, project management, requirements analysis, system concept development and design, engineering design, software engineering, network and security engineering, hardware and software integration, design and development of database management systems, site certification and accreditation, domestic and international fielding (delivery, installation), training (formal classroom, on-site and on-line), system administration and network management,

operational end-user support, and trouble monitoring desk support, configuration management, acquisition and property accountability, sub-contractor management, and conference support.

Cowan & Associates, Inc.

Cowan & Associates, Inc. (C&A) is a wholly Veteran-owned small business based in Arlington, VA specializing in management consulting to DoD clients. Its staff of 10 consultants provides a variety of program support to its clients, and its technical capabilities include Program Management, Information Technology, Supply Chain Logistics, Training and Facilitation, Marketing and Communication, Executive Education Development, and Marketing and Communications and additional functional areas listed below.

Past Performance

C&A is a GSA MOBIS Schedule Contractor, GS10F-0246S within the following functional areas, or Special Identification Numbers (SINs):

SIN 874-1 Consulting Services:

Services may include providing expert advice, assistance, guidance or counseling in support of agencies' management, organizational, and business improvement efforts. This may also include studies, analyses and reports documenting any proposed developmental, consultative or implementation efforts. Examples of consultation include but are not limited to: strategic, business and action planning; high performance work; process and productivity improvement; systems alignment; leadership systems; organizational assessments; cycle time; performance measures and indicators; program audits; and evaluations.

SIN 874-2 Facilitation Services

Includes facilitation and related decision support services to agencies engaging in collaboration efforts, working groups, or integrated product, process, or self-directed teams. Agencies bringing together diverse teams and/or groups with common and divergent interests may require a neutral party to assist them in: the use of problem solving techniques; defining and refining the agenda; debriefing and overall meeting planning; resolving disputes, disagreements, and divergent views; logistical meeting/conference support when performing technical facilitation; convening and leading large and small group briefings and discussions; providing a draft for the permanent record; recording discussion content and focusing decision-making; and preparing draft and final reports for dissemination.

SIN 874-3 Survey Services

Development of data quality objectives or other performance measures which define survey objectives (e.g., acceptable total error, magnitude of sampling error, level of non-response, degree of acceptable bias). These objectives are used to determine sample size and methodology. Support services in the design of the sample selection, collecting data and procedures for administration of records management and data collection, reduction, processing, analysis and interpretation.

Additionally, C&A has technical capabilities in the following functional areas::

Supply Chain Logistics Management

Delivers short- and long-term customer focused solutions to improve clients' distribution networks, facilities, supply sourcing, transportation modes, and material handling. Includes analysis and modeling of networks, facilities and inventories that will support clients' strategic process. Goal is to better comprehend the variables and risks, in order to achieve greater confidence in the solution and transition plan. Planning and executing the interim steps to achieve desired end state.

Financial Management

The C&A Team has extensive experience in federal financial management and analysis, particularly DoD Planning, Programming, Budgeting, and Execution (PPBE) and budget execution. C&A's expertise includes include tracking and verifying financial status in various DoD financial systems; researching, analyzing and preparing data for financial and program reviews; and identifying funds available for reprogramming or recouplement.

Information Technology Support

As a seamless extension of the client's IT organization, C&A provides wide-ranging project management, contractor support, requirements analysis, needs assessments, audits and IT strategic planning. Delivers comprehensive Enterprise Resource Management (ERM) support in planning and executing acquisition of enterprise-wide software, hardware and services. Proficient in Software Asset Management (SAM) and Enterprise Software Acquisition.

IT Strategic Sourcing and Vendor Management

C&A provides program support to its DoD clients on IT strategic sourcing and vendor management activities, covering virtually every aspect of information technology sourcing and relationship management. This enables DoD customers to maximize buying power by acquiring and managing the right commercially available IT and services on a DoD-wide basis.

Program Management

Provides advisory services ranging from a one-time diagnostic to the practical application of program management best practice processes, techniques, and tools tailored to the client environment. Includes: strategic planning; organizational design and staffing; integration of budget and performance information; integration and control of program cost, schedule, technical, and benefits baselines; program performance measurement; requirements management; acquisition and procurement planning and execution; program evaluations; business case development; program documentation development and management. These services range from the establishment of program objectives to the application and tailoring of best practices, as well as providing on-site management and technical skills to execute all phases of the program effectively.

Strategic Planning

C&A provides systematic processes for developing and executing plans for the overall course and direction of the enterprise to optimize future potential. Collaborates with clients to assure that the strategic plan is comprehensive and appropriate, and to assure that limited resources are focused in support of the plan. Process encompasses both strategy formulation and implementation planning to identify and obtain information needed, measure key success factors and successful implementation.

Business Process Reengineering

Business Process Reengineering (BPR) projects offer the opportunity for significant improvement in the overall performance of an organization. In order to be successful, expertise is needed in the analysis, design and implementation of the system. C&A is experienced in all phases of the BPR lifecycle and in utilizing methodologies such as Process Mapping, Continuous Improvement, and Lean Six Sigma to ensure a successful design and implementation of new processes.

Acquisition Management

C&A provides integrated, comprehensive acquisition support to align processes and goals with overall results. Our mission-driven solutions enable clients to define requirements based on objectives and performance. We help to document policies and procedures that create a framework for improved contract management, including performance measurement and acquisition lifecycle support.

Training and Facilitation

C&A provides coaching, training, change management, team building programs, facilitation services and customized action plans to companies, large and small. Our goal is to inspire companies toward greater innovation and success. We have proven experience developing, delivering and facilitating training for large and small scale initiatives, and offer on-site delivery as well as conference facilities at our convenient and centrally located Crystal City office in Arlington, Virginia.

Business Development; Communications & Outreach

C&A Inc. develops strategies, mechanisms and mediums for their clients to communicate an effective and compelling story to their customers. Perform market analysis, business development plan and acquisition strategies. Adept at performing market analyses by customer surveys and focus groups, and developing communications and outreach action plans.

Surveys and Performance Measurement

Performance Measurement can be a very valuable tool for managers to assess the effectiveness of the organization. C&A has significant experience in conducting surveys and developing metrics to review current status, communicate current measurements and create action plans to improve the performance of your organization. C&A is committed to ensuring that clients have the information they need to make better decisions, reduce costs and increase efficiency of their people and systems, and can help clients identify quality value-added measures that are linked directly to business goals.

Academia and Foundation Services

C&A assists foundations and nonprofit organizations in strategic planning, program design, implementation, and evaluation. We help clients define policy and programmatic issues, manage and execute operational projects, design and conduct program evaluations, and develop communication strategies and programs. Special strength with Executive Education and Continuous Learning.

CGI Federal, Inc.

Full service systems integration and outsourcing service provider focusing on:

- Network and infrastructure design, implementation, and maintenance
- COTS implementation
- Systems integration
- Business process services
- Full lifecycle software development
- Transformation services – business process reengineering, enterprise architecture, change management, program management

a. Prime Contract Number: USCA-96-C-0005, Courts

Subcontract Number: N/A

Work Performed:

CGI Federal implemented and is supporting Momentum Financials (known as FAS4T, Financial Accounting System for Tomorrow at the courts) application in the 94 U. S. District Courts and the Circuit Courts across the country. FAS4T provides the district courts with a unified federal financial accounting system that tracks budgetary spending at detailed level and allows the AO to have a unified set of standards and financial management reports to explain to Congress where and what budget dollars are spent. FAS4T provides the courts with financial controls, automated workflow and electronic approvals, and the capability to support their purchasing, check payment, accounting, and budgetary needs.

Government Customer POC: Philip McKinney, Chief, Accounting Financial Systems Division, Administrative Office of the United State Courts

Phone Number:

(202) 502-2200

b. Prime Contract Number GS00K95AFS0004/System Life Order SOPIZAQ-97-C-0034, Global Financial Management System (GFMS)

Subcontract Number N/A

Work Performed

The Department of State's Global Financial Management System (GFMS) program consists of several projects, including the on-going maintenance and support of CGI's Federal Financial System (FFS), implementation of CGI's Momentum® Financials for State's overseas accounting operations, migration of FFS to Momentum for domestic operations, and support of the Integrated Logistics Management System (ILMS) implementation, which includes several integration points between FFS/Momentum and other applications such as CGI's Procurement Desktop and PeopleSoft applications.

Government Customer POC Ms. Dawn Parrish, 703-875-6900, COTR, Department of State

Phone Number

(703) 516-1708

c. Prime Contract Number 194:0-12RBP, eVA

Subcontract Number N/A

Work Performed

CGI was engaged to provide a comprehensive, integrated solution addressing the Commonwealth's vision for electronic procurement. Using our proven transformation and project management methodologies, CGI delivered a full range of business and technical management services assisting in the development and implementation. eVA is a hosted, fully integrated web-based procurement system that takes full advantage of best business practices, the latest technology, and industry standards. Via a centralized portal, Commonwealth agencies, institutions and public bodies are now able to conduct business in a decentralized manner while capturing the efficiency and effectiveness of a virtual centralized organization. Significant business process reengineering resulted in visible benefits (ease of use, time savings, cost savings, information sharing) for each stakeholder in the Commonwealth's procurement process. This innovative solution enables the Commonwealth to obtain goods and services easier, faster, and at the best value.
